

**ATTORNEY DOCKET NO. 23231.0006U2  
PATENT****ABSTRACT**

The present invention provides a unique method and or device suitable for producing a transplantable cellular suspension of living tissue suitable for grafting to a patient. In applying the method and or in using the device donor tissue is harvested, 5 subjected to a cell dissociation treatment, cells suitable for grafting back to a patient are collected and dispersed in a solution that is suitable for immediate dispersion over the recipient graft site.
